EDUCATION

Indian Institute Of Information Technology Agartala

2023 – 2027

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.52

Amrit Public School Mau, UP

2021 – 2022

Senior Secondary (XII)

Percentage: 90.0%

RELEVANT COURSEWORK

- Data Structures
- Database Management (DBMS)
- Computer Networks
- Analysis of Algorithms
- Operating Systems
- Object-Oriented Programming

PROJECTS

Food Distribution Platform — MERN Stack Web Application  

- Engineered a full-stack **MERN** platform connecting food donors with NGOs and shelters to manage surplus-food donations, claims, and pickups through a centralized workflow.
- Implemented secure **JWT authentication with refresh tokens** and **role-based access control (RBAC)** across **3 roles**—Donor, Recipient, and Admin—with protected REST APIs.
- Designed and integrated **19 REST API endpoints** using Node.js, Express.js, MongoDB, and Mongoose for authentication, donations, claims, profiles, and administrative operations.
- Built real-time donation workflows using **Socket.io**, supporting **4 status states**—Available, Claimed, Picked-up, and Completed—for live workflow tracking.
- Integrated **Google Maps geospatial queries**, Twilio SMS, and Nodemailer for location-based matching and automated notifications, with input validation, rate limiting, Helmet, and CORS protection.
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js, Socket.io, JWT, Mongoose, Material-UI, Google Maps API, Twilio, Nodemailer.

CodersHub — Developer Analytics Platform  

- Engineered a full-stack **MERN** developer analytics platform aggregating coding activity from **3 platforms**—**GitHub, LeetCode, and Codeforces**—into a unified dashboard.
- Developed **Node.js and Express.js REST APIs** with MongoDB Atlas and Mongoose to fetch, process, store, and serve developer profiles, repository statistics, and competitive-programming metrics.
- Built interactive dashboards using **React.js, Vite, Tailwind CSS, Recharts, and React Calendar Heatmap** to visualize ratings, problem-solving trends, repository activity, and contribution history.
- Implemented a **2-profile comparison module** with side-by-side rating, solving, repository, chart, and win-matrix analysis for developer performance comparison.
- Developed a dynamic **milestone and badging system** that evaluates coding metrics and awards achievements based on problem-solving, GitHub activity, and programming-language usage.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB Atlas, Mongoose, Tailwind CSS, Vite, Recharts, Axios, GitHub API, LeetCode API, Codeforces API.

CERTIFICATIONS & ACHIEVEMENTS

- **Meta Hacker Cup 2024:** Advanced to Round 2 of Meta’s global algorithmic coding competition; ranked **2,521st** in Round 1 and **3,636th** globally in Round 2.
- **LeetCode:** Solved **715+ algorithmic problems** across Easy, Medium, and Hard difficulty levels and achieved a peak contest rating of **1792+**. [Profile](#)
- **CodeChef:** Achieved a peak rating of **1424+ (2-Star)** through consistent participation in competitive programming contests. [Profile](#)
- **GirlScript Summer of Code (GSSoC):** Contributed to open-source projects by implementing features, fixing issues, and collaborating with developers through Git and GitHub.

TECHNICAL SKILLS

Languages: C++, C, JavaScript, Python, Go

Frontend Architecture: React.js, HTML5, CSS3, Tailwind CSS, Vite

Backend & APIs: Node.js, Express.js, RESTful APIs, Socket.io

Databases: MongoDB, MySQL, SQL, Mongoose ORM

Tools & Cloud: Git, GitHub, Linux Shell, Postman, VS Code, Chrome DevTools

Core CS Foundations: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks
